Instrumente aus martensitischem Stahl

Alle Bontempi Instrumente werden mit dem besten martensitischen Stahl, auch „chirurgischer Stahl“ genannt, hergestellt. Sollten aber die Instrumente der Wirkung von bestimmten Chemikalien ausgesetzt werden oder sollten die empfohlenen Konzentrationen/Einlegezeiten nicht beachtet werden, kann es zu Glanzverlust, Korrosion oder sogar zu einer Veränderung der oberflächlichen physischen Eigenschaften kommen.

Deshalb dürfen Instrumente aus chirurgischem Stahl nie längere Zeit der Wirkung von Chloridlösungen ausgesetzt werden. Außerdem dürfen solche Instrumente nie der Wirkung von Chlorlösungen, Hypochloriten, Eisenchlorid, Salzsäure und Jod ausgesetzt werden, oder längere Zeit in Kontakt mit den o.g. chemischen Mitteln bleiben.

Martensitic steel instruments

All Bontempi instruments are made up of high quality martensitic steel, also known as surgical steel. Nevertheless, in case of exposure to the action of some particular chemical substances, or should these substances be used in wrong doses or exposures not be observed, instruments might be subject to loss of polish, corrosion or even to an alteration of their superficial physical properties.

Therefore, surgical steel instruments shouldn't be exposed to the prolonged action of chloride solutions. Moreover, instruments should never be exposed to the action of or kept in prolonged contact with chlorine solutions, hypochlorites, ferric chloride, hydrochloric acid and iodine.

Strumenti in acciaio martensitico

Tutti gli strumenti Bontempi sono prodotti con i migliori acciai martensitici, detti anche acciai chirurgici, tuttavia se sottoposti all'azione di alcune particolari sostanze chimiche o in dosi o tempi superiori a quelli raccomandati, possono essere soggetti a perdita di lucentezza, corrosione o addirittura possono essere alterate le loro qualità fisiche superficiali.

E' quindi indispensabile non sottoporre gli strumenti in acciaio chirurgico all'azione prolungata di soluzioni di cloruri. Gli strumenti, inoltre, non devono mai essere sottoposti all'azione o al contatto prolungato con soluzioni di cloro, ipocloriti, cloruro ferrico, acido cloridrico, iodio.

Instrumental en acero martensítico

Todos los instrumentos Bontempi están fabricados con el mejor acero martensítico acero quirúrgico de máxima calidad, pero aún así puede sufrir corrosión o pérdida de brillo si ha soportado la acción de alguna sustancia química en dosis o tiempo superior al recomendado por el fabricante.

Por este motivo el instrumental quirúrgico NUNCA debe ser expuesto a la acción del cloro, hipoclorito, cloruro férrico, ácido clorhídrico o yodo, por un período superior al recomendado ni en un porcentaje que no sea el adecuado y recomendado por el fabricante.

Instruments avec acier martencitique

Tous les instruments Bontempi sont fabriqués avec les meilleurs aciers martensitique, aussi appelés aciers chirurgicaux. Toutefois, s'ils sont soumis à l'action de certaines particules de substances chimiques en quantité supérieure à celle recommandée, ces instruments peuvent alors perdre leur clarté et leur qualité peuvent être altérée à cause de la corrosion.

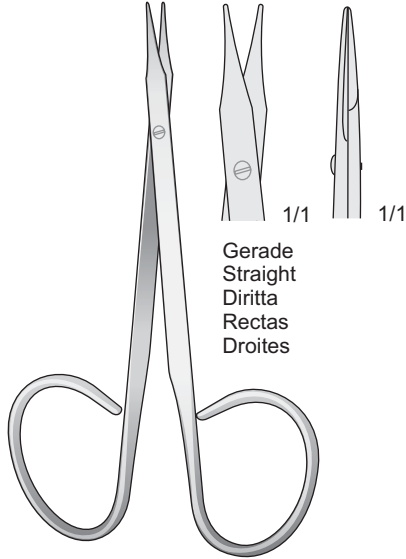

Il est indispensable de ne pas soumettre ces instruments en acier chirurgical à des solutions de chlorure de façon prolongée. Il est en de même pour l'exposition au chrome à l'Hypochlorite, à la chlorure ferrique, à l'acide chlorhydrique et à l'iode.
